## Tutoring Experience

For the past two decades, I've worked with students across various curriculums, including IB, A-Level, and IGCSE, specialising in English Literature and Language. My students have consistently achieved top marks and successfully gained admission to prestigious universities. I focus on critical analysis and essay writing, ensuring students build the skills needed for long-term academic success.

Throughout my career, I've taught both online and offline, adapting to each student's needs. Many of my students come from diverse backgrounds, including the Netherlands, the UK, and international schools worldwide. With tailored lessons, I support students in mastering difficult texts, from Shakespeare to modern literature.

In addition to school-level tutoring, I've assisted students with university application essays and personal statements. Many have gone on to study at leading institutions, confident in their writing and analytical abilities. My extensive experience has helped hundreds of students excel in their exams and future studies.
